2. Me. S. M. Gupta	Promoter Director	2	2

(E) Management

Management Discussion and Analysis Report:

ERP:

ERP software once considered a necessary commodity in the IT infrastructure—is now viewed as a strategic asset for organizations that want to remain competitive by quickly adapting to change and accelerating business performance. ERP helps to control data and facilitates the necessary contacts to acquire the same.

Oracle Solaris and Linux Development

The Company plan is to use the expertise of Oracle Solaris and Linux Development track which is designed for application developers who are porting or creating applications for Oracle Solaris and Oracle Linux. The Company will train the developers as to how to develop, multithread, compile, and tune the native C/C++ and FORTRAN applications. Use the Oracle Solaris Studio tool chain—parallelizing compilers, code-level and will use memory debuggers, performance and thread analysis tools, optimized math libraries, and support for the latest parallelizing industry standards—to master multicore SPARC and x86 systems from Oracle.

Service-Oriented Architecture (SOA)

The Company plan is to serve the Oracle by using the service-oriented architecture (SOA), from basics to a deep dive into best practices for developers and architects. The global companies have implemented SOA in the real world and have used SOA to create a truly flexible, adaptable IT infrastructure.

SAP

SAP is a major enterprise software company with a long history of different software solutions. SAP R3 is an enterprise resource planning (ERP) solution introduced by SAP in the early 1990s targeting large organizations R3 was a breakthrough solution for SAP at the time because it ran on many platforms and operating systems.

Coverage

R3 covered typical ERP functions. Financials, operations, human resources, sales and distribution functionality enabled R3 to cover a broader solution set than most of its competitors. This combination of breadth and depth soon gave R3 the status of one of the top 2-3 solutions in the ERP software market.

Future of SAP

There is a strong demand for SAP software that translates into a robust environment for SAP consultants to design, configure, build and support SAP applications.

ORACLE - ERP

According to the chart above, SAP is still top leader with 31% market share. However, based on AMR Research, SAP market share was 47%, Oracle 25% and Microsoft was only 3%.

Comparison : ERP Solution Satisfaction:-

	SAP	Oracle	Microsoft	Tier II
Benefits Factor	72.2%	58.0%	68.0%	68.6%
Executive Satisfaction	76.4%	75.9%	65.4%	67.7%
Employee Satisfaction	73.6%	60.3%	76.9%	76.5%

BPO Business:

The Indian domestic market has undergone a transformation over the past decade- rising from the periphery to emerge as a reliable, high potential support unity for the country's IT-BPO sector.

BPO destinations:

India, Malaysia, Vietnam, Singapore, Philippines, Latin America, Eastern Europe, South Africa and recently Egypt are considered as significant BPO destinations.

Future of Indian BPO:

Domestic IT-BPO revenue (excluding hardware) is expected to grow at almost 17 per cent to reach Rs 918 billion in FY2012. Global GDP, after growing by 2.7 per cent in 2011, is expected to grow 2.5 per cent in 2012. Strong economic growth, rapid advancement in technology infrastructure, increasingly competitive Indian organizations, enhanced focus by the government and emergence of business models that help provide IT to new customer segments are key drivers for increased technology adoption in India

IT services is the fastest growing segment in the Indian domestic market, growing by 18 per cent to reach Rs 589 billion, driven by increasing adoption from all customer segments – government, enterprise, consumers and SMBs

The domestic software products segment is set to grow to Rs 180 billion in FY2012, a growth of ~13 per cent over FY2011. This segment is being driven by the need to replace legacy systems and technology advancements around cloud, mobility, etc.

Direct employment within the domestic IT-BPO sector is expected to grow by 7 per cent over FY2011 to cross 600,000 employees with the industry creating immense job opportunities in Tier II and Tier III cities.

Risks & Concerns for Indian IT Industry:

Though demand conditions have been optimistic, the Indian IT sector is exposed to certain risks which may hinder growth rate. An appreciating Rupee, slowdown in US economy, shortage of skilled manpower, limitations in domestic infrastructure and competition from other global players. Services provided at a low cost by China, Philippines and Vietnam are threat to Indian companies. The employment and growth has reduced to 16%. Apart from these increasing activities of global MNC's is making difficult for employee retention for Indian Companies.

On the financial front considerable wage increase can reduce the top line as well as the bottom line of the companies. Shortage of experienced and skilled call center professionals is another concern for the industry. In voice based operations infrastructural support as to Zero break down is another continguous factor which affects revenue.

At present there are a number of challenges that are facing the information technology industry of India. One of the major challenges for the Indian information technology industry was to keep maintaining its excellent performance standards.

The experts are however of the opinion that there are certain things that need to be done in order to make sure that India can maintain its status as one of the leading information technology destinations of the world. The first step that needs to be taken is to create an environment for innovation that could be carried for a long time. The improvement however, also needs to be qualitative rather than just being quantitative. The skill level of the information technology professionals is one area that needs improvement and presents a considerable amount of challenge before the Indian information technology industry.

The Indian information technology industry also needs to co-ordinate with the academic circles as well as other

industries in India for better performance and improved productivity. The experts are of the opinion that the business process outsourcing service providers in India need to change their operations to a way that is more oriented to the knowledge process outsourcing. One of the most important crises facing the Indian information technology industry concerns the human resources aspect. The problems with outsourcing in countries like the United States of America are posing problems for the Indian information technology industry as well.

Opportunities and Threats:

NASSCOM & Mc Kinsey & Company conducted a comprehensive study to develop a perspective on the potential of the RIM industry. This report, the rising remote Infrastructure management opportunity: Establishing India's Leadership details the potential of the remote infrastructure in management.

Services providers are expected to enhance focus to domestic market to derisk business & tap into the local growth opportunities.

Lock & Working age population in the developed economies & a significant long term cost, arbitrage indicates India's sustained cost competitiveness.

There are a large number of multinational IT enterprises operating in India in sectors such as:- Integrated chip design, system software, communication software, R & D centres, Technology support sector, captive support sector, BPO sector etc reaping the cost and quality advantages.

India has already established its brand equity in the global IT market. Indian IT software & services firms offer software product/packages, a wide spectrum of IT service, including system management & maintenance, consultancy services, system integration, chip design, E-Governance, E-Commerce, It enabled services covering banking/financial/insurance sector & off shore development on various platform Oracle, SAP, sage & also ERP implementation and having sold their licenses of the software they are looking for implementation partners to serve the client.

For many years now, engineering services have been a strong focus area for both Indian players and captives. But, as recession-struck companies feel the pressures on budgets and innovation capabilities, engineering research and development, has come to bear a more strategic role for long-term development and growth.

The recessionary pressures have also aligned the innovation supply base more towards the emerging nations like India and China. There are questions around the size of the opportunity, newer verticals, and opening up the domestic window. Managing innovation costs are relevant, but more importantly, India has to take a leadership role in driving innovation as clients are scouting for partners for the entire product development cycle. Also, with China's manufacturing prowess, Indian players need an in-depth insight of opportunities and threats to cover ground.

To outline a long-term growth perspective on the sector and pave the way forward for the Stakeholders, NASSCOM have undertaken a comprehensive study. The findings of the report address critical questions related to the sector including:

- Opportunities in the engineering services space
- Role of emerging markets
- Strengths of India beyond costs to become a preferred destination
- Identifying the newer verticals in the offing Understanding competition
- Imperatives and actions required to corner a larger global pie

Growth:

IT-BPO sector has become one of the most significant growth catalysts for the Indian economy. In addition to fuelling India's economy, this industry is also positively influencing the lives of its people through an active direct and indirect contribution to the various socio-economic parameters such as employment, standard of

living and diversity among others. The industry has played a significant role in transforming India's image from a slow moving bureaucratic economy to a land of innovative entrepreneurs and a global player in providing world class technology solutions and business services. The industry has helped India transform from a rural and agriculture-based economy to a knowledge based economy.

Software body Nasscom remains confident about its projection for 16-18 per cent growth of the Indian IT industry in FY'12 despite the economic uncertainty in the US and European markets.

Segment-wise or Product-wise performance:

In view of the identical geographical location and the same product, i.e. ITES, there is hardly any need for separate segmental reporting.

Outlook:

Despite the unprecedented economic downturn the industry will witness sustainable growth. The global technology related spending is expected to grow from 2010 onwards led by growth in the outsourcing adaption.

Internal Control System and their adequacy:

The Company has an Internal Control and Audit System Commensurate with its size and nature of its business.

Discussion on financial performance with respect to operational performance:

The Company has made higher profit during this quarter as compared to previous quarter. Looking at the growth of the business, it seems that the company can achieve better results in the future quarters. The organization plans to implement the expertise of ERP business across Eastern India. Your Company is constantly trying to build relationships with eminent overseas clients to excel in the field of software and web development. It shall approach marketing houses abroad and act as choicest development partners in India.

The company growth is hindered due to lack of working in optimum capacity due to non availability of appropriate manpower who can maintain the standards and quality of delivery. The Company also tried for new manpower development but it is taking time. Endeavors are being made for strategic alliances with software companies in USA.

Your Company is committed to handle new roles and responsibilities and is open to accept new challenges on a global basis by virtue of its strengthened business model. In addition, there are continuous efforts at improving efficiencies and delivering excellence in project execution.

Material Development in Human Resources/Industrial Relation Front, including No. of people employed:

Number of old employees was reduced in view of the low production and of course new skilled manpower was introduced for Medical Transcription and ERP implementation and their is a smooth operational relations with the employees of the Company. The company has outsourced the work to the professional consultants. The Company has attempted lately to develop the required skilled human resource for the future prospective projects in KPO in good hope. The company has taken up International Staffing as a business activity and new avenue for revenue which has strengthen its manpower in domestic and international market. West Bengal has come up strongly as IT HUB and many BPO and other industry players have started to likely to start their operations. Manpower of professionals in IT/ITES has crossed 50,000 in Kolkata and is expected to cross 2, 00,000 in next three years. Staffing has become a part of this industry in domestic and international market. To bridge the gap, the company has targeted to explore market of manpower development, manpower resourcing, developing and delivering under the new name of LENSEL JOBSONLINE and hopeful of success.

The Indian BPO industry is at an interesting juncture of its history. After recording mind boggling growth of nearly 37% you for the Last six years, the sector is faced with a dynamic and volatile global scenario which is throwing up significant challenges. The manpower situation is undergoing a major change in IT BPO, company deals with the slowing global economy. The dynamic market place is also pushing HR within companies to evolve a new and more important role for itself.

Intelenet is an equal opportunity; employer has always believed in and supported equal opportunity for all the professionals at the work place. We believe that monitoring is the best way to motivate and encourage women to reach their full potential and help them through the challenges of balancing a demanding career and a family.
