SAP ENGINEERING YOUR WAY INTO RESILIENCE

Lee and Nee Monthly Digest

The past months have taught us how challenging it is to operate a business with remote staff and social distancing. Without the right systems it is impossible to attain this.

Moreover, your SAP Business One on Cloud can be accessed from anywhere, and comes with Disaster Recovery and Backup Solutions. These are MUST for a pandemic situation like the Covid-19.

SAP Business One enables the users to leverage the software to understand their Cashflow, Inventory, and the fluctuating demand of the current economy. The daily insight of these data allows them to make smarter decisions and pivot with suppliers and customers to keep their competitive edge.

Lee & Nee as the implementation partner for SAP ensured that our clients from various industries, get the complete benefit of the Software during these adverse times of pandemic.

The teams at Lee and Nee aced remote working and successfully completed some projects during the lockdown.

Jutex Industries is several decades old and one of the pioneers of Jute machinery and production Industry in West Bengal. The teams at Lee & Nee and Jutex , joined hands for a successful SAP B1 configuration and implementation. The major milestones achieved by this successful implementation are:

- Stage wise Production tracking in both Machinery & Jute Division.
- Real Time Inventory Costing Calculation.
- Branch Tagging in each Marketing Documents, for Unit Wise P/L & Balance Sheet.
- Multiple Currencies for Import Purchase and Export Sales.
- Maintaining Cost Centre for Employee and Sub Ledgers.
- Payment Consolidation for Government Sales.

Gem Machinery & Allied Industries is listed in Trade India's list of verified sellers offering supreme quality.

The best part of SAP B1 is that , it fits the needs of every industry. Along with the above features, there were some other requirements of Gem Machinery:

- Maintaining Bin Locations for Brought Out and Structural Items- For tracking the exact locations of Items.
- Customized Form developed for maintaining Item Subgroup Wise Preferred Vendor.
- RFQ(Request for Quotation) generation through Purchase Quotation Generation wizard
- SBO Mailer Setup and Outlook Integration for sending Mails.
- Configured Customized Alerts

Waldies is one of the largest manufacturers of Lead Oxides in India. With the large size of the company comes specific company and industry related needs in the software. SAP B1 was customized in a way that suited all their needs. Some of the customizations are:

- End to end purchase and production process including Q.C. process.
- Capturing batch wise production, Inventory transfer and Sales data in SAP B1.
- Complete integrated process for purchase, sales and production etc.
- Incorporation of captive consumption valuation as per CAS-4, for better division wise profitability analysis and compliance with the Government guidelines.
- MRP (Material Requirement Planning), for planning their production and analyzing requirements of raw materials for the same.
- Better traceability and tracking of every raw material, packing material and consumables items in the system with SAP
- Reduction of Inter departmental dependency with department specific reports, Enables the access of all the desired /required reports from SAP directly .
- Customized MIS reports as per management requirement, for better business analysis.
