Online classes, meetings, organising documents, notes, name it and Microsoft has it all sorted.

Microsoft
Ed-Cloud

Office 365

Microsoft Teams

CEO Speaks:

“As a software technology company our vision has remained on how to solve the day to day problems of an organization using technology. Digitisation is an extremely relevant and necessary reform in the education sector. Our goal is to empower educators and learners and let them optimize resources for the best results.”

– Mahesh Gupta, CEO, Lee and Nee Softwares (Exports) Ltd.

Success story:

Our team at Lee and Nee has successfully helped our clients to adapt with the changing norms during this Pandemic.

Navanalanda School, Kolkata, was facing trouble with collecting fees, because of the ongoing restriction of physical interaction. Our team took a hands on approach and developed a **fees management solution** that helped them overcome this hurdle. Our enhanced software solution enables them to accept online payments through the integrated payment gateway and also generate payment reports. Thus solving the problem when required the most.

Colleges were struggling with the newly emerging methodology of digitisation. So were our clients at the **AJC Bose College** at Kolkata. We helped them install the licensed Microsoft Office 365. They have successfully conducted Webinars, Live Events and Meetings through **Microsoft Office 365**.
