

E-Commerce

is one of the approaches that has helped businesses expand and prosper multifold. It has also helped businesses survive during the Coronavirus pandemic. One of the basic prerequisites of implementing E-commerce is having an online presence. Millions of businesses have migrated online and have benefitted from it.

Having an online presence has multiple benefits:

Online presence helps in building brands

Increases audience reach in multifold

Tracking of user behaviour

Lead generation

Increased sales

Encourages digital payments

Online presence has two major aspects:

E- Commerce portal

Digital Marketing
