

Digitisation and Automation: Boons of the Internet

October 2021 Edition

29th October is observed as International Internet Day. The day remarks a major milestone in the history of **Telecommunications and Technology** when the 1st electronic message was sent from one computer to another in 1969.

Interesting facts about

International Internet Day:

- In the beginning the Internet was called ARPANET (Advanced Research Projects Agency Network).
- In 2005, this was the first time when the world observed the first International Internet Day on 29th Oct.

The world has witnessed the power of the internet as it has enabled us to tap into the greater potential of our work and enabled businesses to operate in a seamless manner. There have been multiple, major transformations in the IT and Telecommunications field powered by the internet.

Mobile
Applications

E-commerce

ERP Solution

Cloud Solution

Digital
Marketing

These are some of the major tools that owe their existence and usage to the Internet.

Being in the IT and Telecommunications industry we have catered to over 5000 clients in the last 33 years and have implemented the evolving technologies for them. We were the First Internet Service Provider (ISP) in Orissa. We had developed the First website in Eastern India.
