Projects

- **Project 1**

  Project Title: Breast Cancer Risk Assessment Calculator for Family History
  Date: January 2019 – December 2020 (Currently providing on-demand support)
  Technology Used: HTML, CSS, PHP, jQuery, JavaScript, AJAX
  Project Highlights: This breast cancer risk assessment calculator is a user input based real-time result display application based on Tyrer-Cuzick model. This calculator is built with HTML, CSS and Custom PHP (it has no database connection to track/keep any records).
  Project URL: https://ibis-risk-calculator.magview.com/

- **Project 2**

  Project Title: Relatie Bureau
  Date: May 2018 – December 2019
  Technology Used: CodeIgnitor-3.x MVC Framework, HTML, PHP, AJAX, Java Script, jQuery
  Project Highlights: A leading personal relationship mediation company in Netherlands wanted to re-engineer their software that provides services to 50% of Netherlands. Independent agencies from Netherlands could tie up with the master Company and all tied up Agencies could connect among each. Agencies could appoint unlimited consultants area wise. This project was built with CodeIgnitor MVC framework.
  Key Features of the Application:
  1. Multi-Level User management
  2. Instant Messaging System
  3. Customized Embedded Lead Capture form
  4. Match making based on various preferences between leads

  Project URL: This site was under development stage on client ends while I had worked. The development was live on URL - https://relatiebureau.nl/test/index.php/website (currently this link is not on running status).

- **Project 3**

  Project Title: Fantasy Sport
  Date: September 2017 – March 2018
  Technology Used: CodeIgnitor-2.x MVC Framework, HTML, PHP, AJAX
  Project Highlights: A fantasy sport is a type of online game where participants assemble imaginary or virtual teams of real players of a professional sport. These teams compete based on the statistical performance of those players in actual games.

- **Project 4**

  Project Title: UIDAI Aadhaar eKYC Implementation on a Trading Services
  Date: March 2017 - May 2017
  Technology Used: HTML, PHP, jQuery, Java Script, AJAX
  Project Highlights: Implemented UIDAI Aadhaar eKYC on Trading Services namely **AsthaTrade** to prevent registration with fake identity. The KYC information provided is pre-verified, digitally signed and accepted by all major regulators such as RBI, TRAI, IRDA, SEBI etc. as legally valid KYC document.
  Project URL: https://asthatrade.com/

- **Project 5**

  Project Title: UK Hotel Booking Web Application
  Date: January 2017 - February 2017
  Technology Used: CodeIgnitor-2.x MVC Framework, HTML, PHP, AJAX, Java Script, jQuery

Project Highlights: Flyooway is a travel product web application. They act as an agent on behalf of The Global Travel Group Ltd in connection with the sale of travel products. Unless specified as the operator, The Global Travel Group Ltd is the agent on behalf of ATOL (Air Travel Organizer's License) Protected Tour Operators and other principals.

- **Project 6**

  Project Title: Trading Services
  Date: October 2016 - December 2016
  Technology Used: CodeIgnitor-2.x MVC Framework, HTML, PHP, AJAX, Java Script, jQuery
  Project Highlights: AsthaTrade is India's leading discount broker with the highest margin funding. They trade in NSE and MCX, discount broker offering the lowest, cheapest brokerage rates in the industry. They offer option trading, commodity brokerage, futures trading, and brokerage services in India. This project was built with CodeIgnitor MVC framework.
