WORK EXPERIENCE

Computer Programmer

Uttar Banga Krishi Viswavidyalaya (NAHEP-IG)

📅 March,2020 – March,2023   📍 Cooch Behar, WB

- Developed PHP models using objects-oriented programming (OOPS) concepts.
- Worked on HTML, CSS, JavaScript, jQuery, Ajax and their integration within a PHP environment.
- Used the model view controller (MVC) framework to build modular and maintainable applications.
- Used REST based web services and JSON parsers for data interchange.
- Supported existing applications like adding new features to a webpage, data corrections, development issues.
- Implemented application security and data assurance software.
- Payment Integration with multiple banks following NPCI specification using third party API.
- Develop and maintained functions, procedures, triggers, indexes using MySQL database programming language.

Associate – Field Network Engineer

Sify Technologies

📅 June,2017 – Nov,2017   📍 Kolkata, WB

- Running field operations, offering technical support and troubleshooting on-site issue.
- Installing, configuring and supporting firewall to ensure network security.
- Tested and analyzed network coverage to ensure contiguous communication and network integrity and quality.

PROJECTS

NAHEP-IG Project Web Application

- Build an informative web application on NAHEP-IG project.

Artwork Web Application

- The purpose of this website is to display the art work of the painter and make it available for enthusiasts and collectors at an affordable price. I worked on URL to make SEO friendly, payment section and other bugs.

Services Web Application

- A common platform for all, where can find the right person for daily household maintenance solution. I built some new modules.
