

Testimonials

“SAP B1, with the expert support of Lee & Nee’s, has transformed our organization by streamlining data migration, enhancing interactions with MSMEs, and automating processes across divisions.”

Mr. V Teja Deepak (IAS), Executive Director, WBSIDCL

“A systematic management with a proper ERP was a much needed thing for our business. LNSEL’s team of young managers & developers helped us from planning to implementation of SAP B1 with a proactive approach. We are really thankful to them.”

Mr. Sourav Daspatnaik (Managing Director), Swach Environment Private Limited

SAP Business One

Tailored Solutions for Every Need of Your Small and Midsize Business

Financial management

Business intelligence

Production planning

Purchasing and
inventory control

Sales and customer
management

Analytics and reporting

Transparent inventory control and distribution

SAP Business One provides accurate information about inbound and outbound shipments, inventory, and item location. You can value inventory using standard costing, moving average, FIFO, and other methods; monitor stock levels; and track transfers in real time. You can run real time inventory updates and availability checks and manage standard and special pricing. You can also apply volume, cash, and customer discounts and run reports that reveal their impact.

- Warehouse and inventory management
- Bin location management
- Goods receipt and issue control
- Production and material requirements planning
- Efficient reporting

Take Control of your Finances

SAP Business One offers a comprehensive financial management solution. It automates accounting tasks, streamlines banking processes, and provides real-time insights into your finances.

- Automate journal entries, receivables, and payables
- Manage cash flow, assets, budgets, and costs
- Simplify asset management with automated data entry
- Banking and reconciliation

Optimize buying and purchasing to increase margins

Every small business needs a systematic approach to managing the procurement process, from requesting vendor quotes, to creating purchase requests and paying vendors. SAP Business One helps manage the complete order-to-pay cycle, including receipts, invoices, returns, and payments. Integrated reporting tools let you easily compare suppliers and prices to negotiate better deals and identify opportunities for cost savings.

- Procurement
- Master Data Management
- Warehouse and accounting integration
- Process accounts payable
- Easier, up-to-date reporting

Business intelligence, analytics and reporting

SAP Business One offers powerful reporting and analytics tools. With SAP Crystal Reports, you can gather data from multiple sources and generate timely and accurate reports based on company-wide data.

With optional analytics powered by SAP HANA, SAP Business One takes advantage of in memory computing for analysis and reporting. You gain real-time access to predefined dashboards and reports, as well as productivity tools to support decision-making

- Report creation and customization
- Interactive analysis
- Intuitive tools
- Analytics plus pre-defined KPIs
- Enhance your reports

Find an industry-specific solution for your expanding business

SAP Business One offers industry-specific solutions to meet your unique needs. Whether you're in consumer products, industrial machinery, professional services, retail, or wholesale distribution, SAP Business One provides the tools and functionality to help you streamline operations, improve efficiency, and drive growth.

As your business grows, you can extend SAP Business One to meet your specific business and industry challenges using the SAP Business One studio, software development kit, or any of over 500 add-ons solutions built by our partners.

And now there is a SAP Business One to suit your business today and tomorrow and the future.

SAP Business One offers flexible deployment options. Choose from cloud, mobile, or on-premise solutions to find the best fit for your business, both now and in the future.
