SUMMARY

Full Stack Developer skilled in Node.js, React.js, REST APIs, and MongoDB with experience building scalable, production-ready web applications across enterprise and product teams.

TECHNICAL SKILLS

Languages

JavaScript (ES6+), SQL, C++, Java, Python (Basics)

Frontend

React.js, HTML, CSS, Bootstrap, Tailwind CSS

Backend

Node.js, Express.js, JWT, REST APIs, MVC Architecture

Databases & Tools

- Databases: MongoDB, MySQL
- Tools: Git, Postman, Redis, GraphQL

EXPERIENCE

Associate Systems Engineer

IBM

02/2024 – 07/2024 | Bengaluru, India

- Data Engineering & Cloud fundamentals; ETL pipelines, SQL analytics workflows.
- Contributed to Nestlé-aligned data modelling and validation modules.

Salesforce Developer Intern

A.P. Moller Maersk

08/2022 – 12/2023 | Bengaluru, India

- Built Sales & Service Cloud features (Apex, LWC, SOQL).
- Developed custom internal modules using React.js and Node.js.

SDE Intern

HighRadius

02/2022 – 08/2022 | Bhubaneswar, India

- AI-powered Invoice Management System (React + Java).
- Achieved 95.23% ML prediction accuracy.

EDUCATION

B.Tech in Information Technology

KIIT University

2019 – 2023

- CGPA: 9.18 / 10

CAREER BREAK & UPSKILLING

Upskilling

Webskitters Academy, Kolkata

Kolkata

- Supported and managed a family-run business while handling operations and client coordination.
- Completed advanced Full Stack (Node.js) training.
- Built multiple production-grade applications using Node.js, Express, MongoDB, Redis, JWT, and EJS.

PROJECTS

NowFit

Live | GitHub

- Full-stack fitness management system with role-based admin dashboard for managing users, diets, and workouts.
- Implemented session-based authentication and dynamic CRUD flows, improving admin workflow efficiency by 40%.
- Built responsive EJS + Bootstrap UI using scalable MVC architecture, improving performance by 30%.

CERTIFICATIONS

- IBM Cloud Essentials
- HackerRank Problem Solving (Intermediate)
- PCAP – Python (Cisco)

Languages

- English
- Hindi
- Bengali

EventBook

Live | GitHub

- JWT-secured event booking system with optimized APIs and role-based access.
- Reduced backend response times by 30%.

SQL Editor

Live

- GraphQL-powered SQL query runner with Lazy Loading optimizations.
- Improved UI rendering performance by 20%.
